## **SENIOR PROJECT MANAGER**

### **Position: PMGEOL**

Aurora Geosciences Ltd. has one Yellowknife-based position for a qualified exploration geologist with extensive diamond drill program experience. The successful candidate should be prepared to work with a dynamic team in a professional environment.

Responsibilities will include managing a multi-drill advanced exploration program geared towards resource delineation, data QA/QC/processing/interpretation, preparation of technical reports, and coordinating with a number of subcontractors to support a multidisciplinary approach to the program. This position will require a balance of field and office placement.

The ideal candidates will have strong leadership and organization skills, the ability to work well with a team and be self-motivated. Applicants should be physically fit, capable of working in remote and rugged areas under various climatic conditions and be prepared to travel extensively. Employees will be expected to participate in exploration programs in the NWT, Yukon, Nunavut. Experience in Northern Canada's geologic terrains and logistical environment would be an asset.

#### Qualifications:

- Bachelors degree in Geology
- Minimum of 15 years of experience in mineral exploration
- Practical experience managing a range of exploration programs from grassroots to advanced phases.
- First-hand experience working either in the geologic terrains of Canada's North or similar terrains elsewhere
- Practical experience managing and
- Practical experience logging diamond drill core.
- Proven ability to manage and direct drill programs with greater than 5 active drills
- Proven ability to manage a remote exploration camp with more than 50 workers onsite
- Positive safety record and familiar with the H&S requirements of the WSCC of the Northwest Territories
- Effective written and verbal communication skills
- Proficient with Microsoft Word, Excel, Access
- Able to work in the field for extended periods of time
- Experience mineral resource modelling and using relevant software an asset
- Experience with lead-zinc carbonate replacement deposits an asset
- Effective mentor of junior personnel

Employment Status: Contract (2 years)

Salary: To be determined based on experience

Location: The successful applicant will be based from the Yellowknife office. Residence in the NT is not a requirement.

Interested applicants should forward their resumes, including references, to our Human Resource Department at [careers@aurorageosciences.com](mailto:careers@aurorageosciences.com) and quote PMGEOL in the correspondence.
