JOB POSTING FOR PROJECT GEOLOGIST

Aurora Geosciences (AGL) is a mineral exploration consulting company that has been operating for 39 years and has offices located in Whitehorse, Yellowknife, Vancouver and Juneau AK.

Reporting to the Operations Manager, the Project Geologist would be responsible to work with appropriate clients to organize, supervise and direct mineral exploration programs across northern Canada. This is an office and field based position. Candidates should be prepared to work in a professional office environment conducting research, data processing and writing technical reports as well as being physically fit and capable of working in remote and rugged areas under various climate conditions for extended periods of time. Candidates should also be prepared to travel extensively.

Responsibilities include:

- Geochemical survey design, planning and execution
- Diamond and RC Drill program design, planning and execution
- Manage, direct, supervise and work alongside field crews and survey data
- Provide training and supervision to field crews
- To prepare field, technical, assessment and other reports
- Assist with project proposals
- Accurately track project expenditures
- Ensure company and client operational standards are adhered to

The ideal candidate will have:

- Professional registration as a Geologist in Canada
- Minimum 5 years related experience
- The ability to efficiently manage multiple projects
- Practical and professional experience executing field programs
- Experience with geological services that AGL provides
- An understanding of the logistical and operational challenges of conducting mineral exploration in the NT, YT & NU
- Effective written and verbal communication skills
- Proficient computer and other technology-related skills
- The ability to effectively manage a large number of conflicting tasks and priorities
- Excellent time and stress management skills
- The ability to be an effective leader
- Background in structural geology or geochemistry would be an asset

Interested applicants should apply [online](#) and submit their resume to careers@aurorageosciences.com with **Project Geologist** in the correspondence.
